

SEIKA is working on the following as measures against infectious diseases.

① When entering school

- Checking physical condition and body temperature for children, school staff, and visitors
 - Washing hands and gargling water, and wearing mask is required.

② Environment of nursing and education

- Nursing room and shared place disinfection
- Disinfection after using common items
- School building and Room ventilation (over 5 minutes in a hour)
- Placement of desks in the classroom (Use only 2 people per side per table)
- Numbers of use for cherry class (limited number of people)
- Increasing of hand sanitizer location
- Display of waiting places for social distance
- Keeping the mask in a separate case when attaching or detaching the mask due to educational content

③ School Buss

- Taking body temperature and sanitizing hands before getting on school bus
- Dedicated disinfectant on bus
- Fixed seating position for children
- Car disinfection on every arrival

④ School Lunch

- Coordination of less risky menus
(Creating menus that reduce the process of serving while maintaining proper nutritional value)
- Preparing an enjoyable environment using sound etc. while instructing not to talk during meals
